5-6 Year Plan

(Example only – profits made from Forex will vary each month depending on the performance of the Traders – expected to be between 15% - 25% per month)

This worked example is based on investing in a \$300 “Trading Pack” (£235) and then putting no more money in.

No allowance made for any other bonuses in growing your team.

\$300 will grow to well over \$150,000 (£120,000) within 5-6 years.

Ideal for a children’s savings plan – Imagine \$300 (£235 into \$150k (£120k) in 5-6 years for your child (or yourself !!).

The principal of this example is to invest only \$300 (£235) and let the account grow by it’s own means and be sustainable without you keep investing more of your own money.

When you withdraw the profits from CashFX to fund the next Trading Pack, then a 20% withdrawal fee is taken as well which is not kept by CashFX but is put into a bonus pot called a “Team Bonus Plan”. 60% of this is shared within your matrix group and the remaining 40% goes towards leadership prizes when you progress into the business.

NOTE: Ideal for children to build up their savings by starting off with \$300 (£235) as they have no time pressures and are happy to wait 5-6 years without any financial pressure.

Adults would probably start off at a higher start up when they are comfortable with the principle of CashFX.

This example is just the first way of making money (ie: getting in at whatever level you can afford or wish to try).

The second way of making money is by telling people about how this works and how you are making money straightaway. If they are interested in joining you by doing the same thing, then you will

receive a cash bonus when they sign up and then every time they purchase a new Trading Pack or someone they have helped join then you get a cash bonus as well.

The third way of making money will be available around November 2020, allowing you to copy trade the professional traders using separate capital.

The percent was 6.20% 🙌🙌 and depending on what Academy package you choose, here are the week's #totals.
👇👇

\$300 = \$13.02
\$500 = \$21.70
\$1k = \$43.40
\$2k = \$86.80
\$3k = \$130.20
\$5k = \$217.00
\$7k = \$303.80
\$10k = \$434.00
\$15k = \$651.00
\$20k = \$868.00
\$30k = \$1,302.00
\$40k = \$1,736.00
\$50k = \$2,170.00
\$70k = \$3,038.00
\$100k = \$4,340.00

The above are **weekly** profits we get paid (ie: each week varies depending on how profitable the trading has been). I have multiplied the weekly amounts by 4 to make monthly amounts in the table above. This is under calculated as there are in fact 4.33 weeks in a month not 4.0, therefore figures should work out better in reality.

The above shows daily percentages which the financial traders made whilst trading the FOREX market.

You get to see these images on the Whatts app group on a daily basis telling you what the profit was per week day.

You get a total percentage for the week together with what your pay out would be depending on which Trading Pack you purchased. Forex (Foreign Exchange Trading is the largest market in the world. It is worth 5-6 Trillion dollars per DAY – 90% of the traders are Banks and Financial Institutions).
